# UWSpace » PHASE 1

## Tri-Agency Open Access Policy:

"Grant recipients are ***required*** to ensure that any peer-reviewed journal publications arising from Agency-supported research are freely accessible within 12 months of publication."

Applies to:

- NSERC, SSHRC grants awarded on or after May 1, 2015.
- CIHR grants awarded on or after January 1, 2008.

SSHRC CRSH

CIHR IRSC

NSERC CRSNG

# UWSpace » PHASE 1

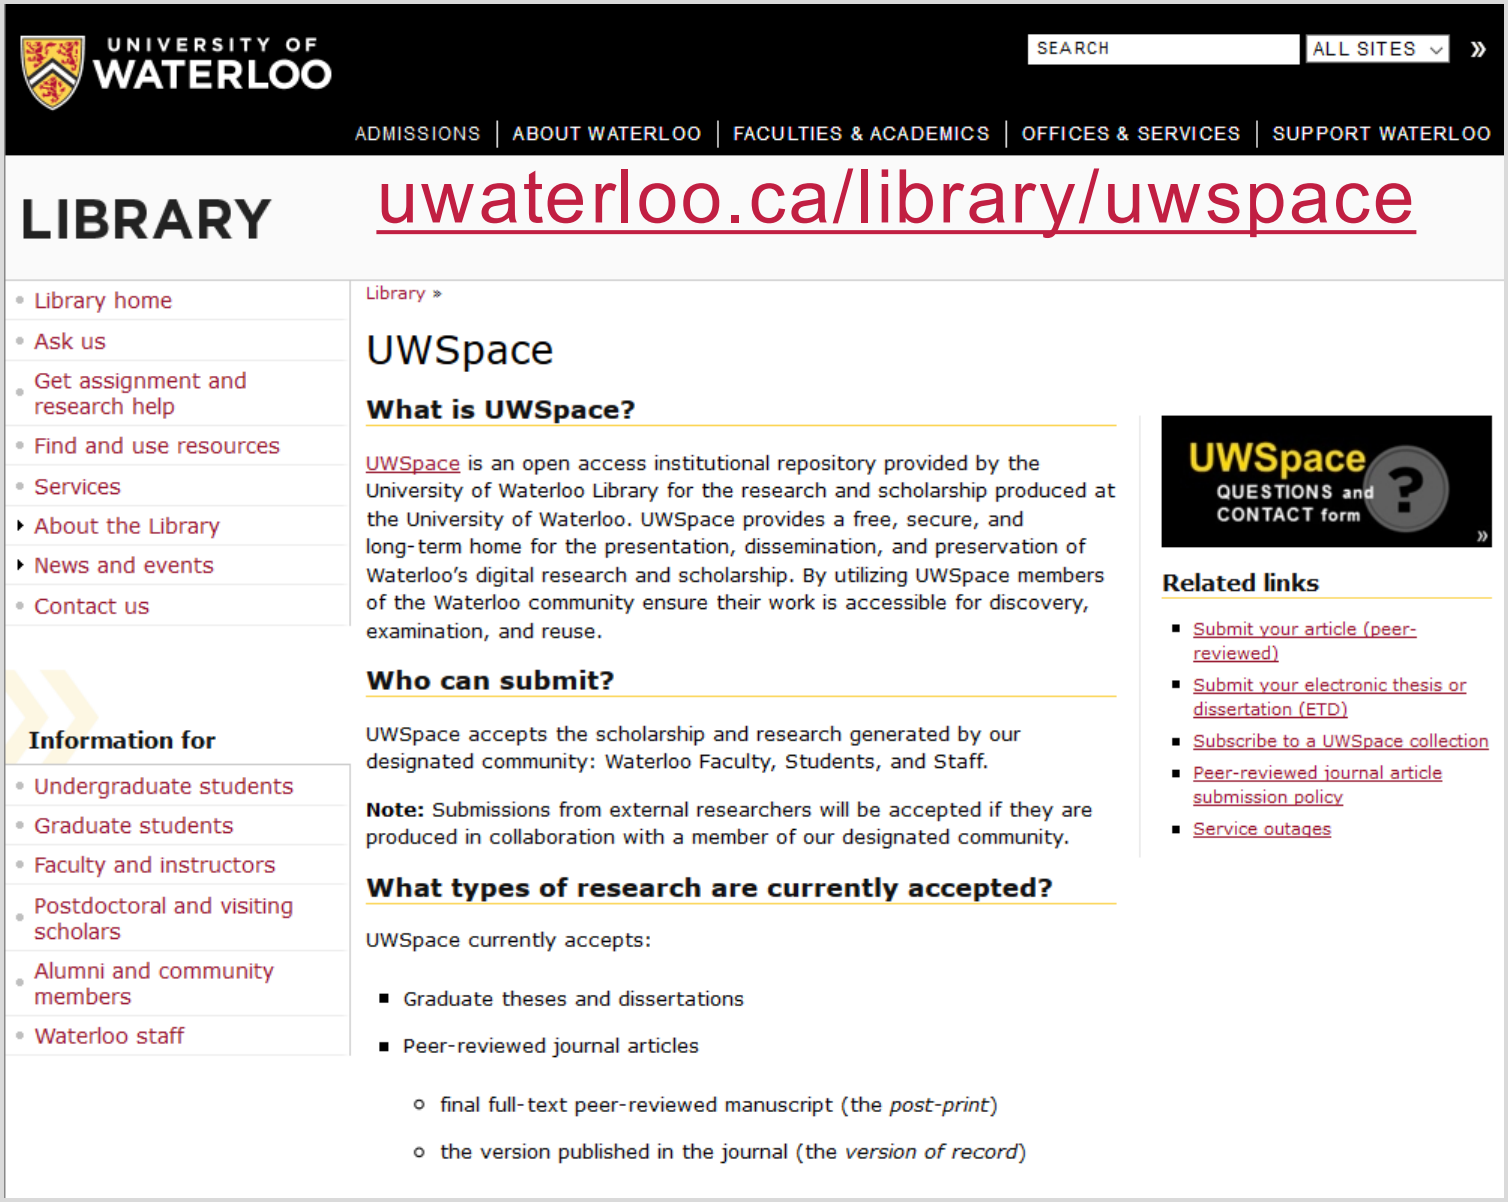

**UWSpace** is a **free** online platform and service for Waterloo faculty, graduate students, and staff. UWSpace now accepts peer-reviewed journal articles generated by researchers during their affiliation with Waterloo.

**UWSpace provides:**

- Compliance with the Tri-Agency OA Policy on Publications
- Open Access option at Waterloo
- Increased impact by archiving with a persistent url
- Service and support

UWSpace
What is UWSpace?
UWSpace is an open access institutional repository provided by the University of Waterloo Library for the research and scholarship produced at the University of Waterloo. UWSpace provides a free, secure, and long-term home for the presentation, dissemination, and preservation of Waterloo's digital research and scholarship. By utilizing UWSpace members of the Waterloo community ensure their work is accessible for discovery, examination, and reuse.
Who can submit?
UWSpace accepts the scholarship and research generated by our designated community: Waterloo Faculty, Students, and Staff.
Note: Submissions from external researchers will be accepted if they are produced in collaboration with a member of our designated community.
What types of research are currently accepted?
UWSpace currently accepts:
Graduate theses and dissertations
Peer-reviewed journal articles
final full-text peer-reviewed manuscript (the post-print)
the version published in the journal (the version of record)

Complex environmental problems cannot be solved using expert science alone. Rather, these kinds of problems benefit from problem-solving processes that draw on 'vernacular' knowledge. Vernacular knowledge integrates expert science and local knowledge with community beliefs and values. Collaborative approaches to water problem-solving can provide forums for bringing together diverse, and often competing, interests to produce vernacular knowledge through deliberation and negotiation of solutions. Organised stakeholder groups are participating increasingly in such forums, often through involvement of networks, but it is unclear what roles these networks play in the creation and sharing of vernacular knowledge. A case-study approach was used to evaluate the involvement of a key stakeholder group, the agricultural community in Ontario, Canada, in creating vernacular knowledge during a prescribed multi-stakeholder problem-solving process for source water protection for municipal supplies. Data sources – including survey questionnaire responses, participant observation, and publicly available documents – illustrate how respondents supported and participated in the creation of vernacular knowledge. The results of the evaluation indicate that the respondents recognised and valued agricultural knowledge as an information source for resolving complex problems. The research also provided insight concerning the complementary roles and effectiveness of the agricultural community in sharing knowledge within a prescribed problem-solving process.

## Goals

- Promotion and Partnerships
- Identify other research outputs
  - Conference Proceedings, Technical Reports, Working papers
- Explore harvesting of externally hosted content
- Identify and implement improvements:
  - Altmetric integration
  - Fundref integration
  - Citations
  - General site enhancements

Altmetric
